

THIRUMURUGAN GNANAM

IT Dev Manager - IT and Cloud Infrastructure | Database | Security & Compliance

Bangalore, India

☎ +91 9011040150 |

thirucare@zohomail.com |

PROFESSIONAL SUMMARY

Senior IT and Cloud Manager with 20+ years of experience across IT infrastructure, database platforms, cloud operations, and security governance. Proven ability to lead cross-functional teams, drive cloud cost optimization, strengthen compliance, improve production reliability, and deliver business-critical outcomes across enterprise environments.

CORE COMPETENCIES

Technical Program Management - People Management - IT Infrastructure - Security Management - Cloud Management (AWS, Azure, GCP, OCP) - Database Management - DevOps – Security & Compliance, Risk & Governance - System Design - Procurement & Vendor Management – FinOps Management

PROGRAM ACHIEVEMENTS

- Drove FinOps optimization initiatives that reduced **cloud spend by 30–40%**, lowering annual costs from **1 Cr to 60 lakhs** through rightsizing and cost allocation controls
- Led business application modernization efforts, improving architecture quality and raising application **performance from 20% to 80%**
- Owned **Jira automation** rollout across projects, streamlining deployment workflows and improving delivery governance and security
- Consolidated DevOps toolchains into GitLab, reducing **licensing costs by 40%** and delivering approximately **\$80K** in annual savings while increasing operational efficiency
- Directed development and Designed an AI-powered **attendance and activity tracking** solution, improving productivity and reducing time wastage through automated monitoring and reporting.

PROFESSIONAL EXPERIENCE

IT Development Manager – (IT Infra and Cloud, Security & Compliance)

Feb 2025

– Present

- Led cross-functional programs across cloud, DevOps, database, and security, aligning delivery with engineering, operations, and compliance.
- Managed 100+ engineers across development, infrastructure, and operations teams, driving execution, accountability, and delivery outcomes.
- Improved application performance from 20% to 80% through architecture redesign, performance tuning, and scalable system enhancements.
- Reduced cloud costs by 30–40% through FinOps, while implementing AWS Control Tower and Security Hub for governance and compliance

- Reduced DevOps licensing costs by 40% and saved approximately \$80K annually by consolidating multiple toolchains into GitLab.
- Led vulnerability remediation management, improving enterprise security posture and reducing exposure to critical risks and acted as technical SPOC for SOC and internal audits, ensuring compliance readiness and supporting audit.
- Collaborated with procurement teams to manage end-to-end procurement activities, align business requirements, and define software development specifications
- Led application development and implemented an AI-powered employee attendance and activity tracking system with real-time monitoring, improving productivity and reducing time wastage.

Grand Mark, South Africa

Business Solution Manager – SQL Server & Cloud

Feb 2022 – Jul 2024

- Led a team of 12 engineers delivering cloud-based solutions across cloud and database platforms.
- Achieved 99.99% availability through optimized architecture and platform improvements.
- Improved MSSQL performance by 35–50% using tuning and indexing strategies.
- Implemented DR and backup strategies reducing data loss risk by 95%.
- Led SYSPRO ERP implementation across 100+ branches in Africa, standardizing business processes and improving enterprise adoption.

Zensar Technologies (India & South Africa)

Project Lead – Database & Cloud Support

Apr 2007 –

Feb 2022

- Delivered enterprise database and cloud solutions for global clients across multiple clients.
- Managed MSSQL environments with 99%+ uptime through proactive support and control.
- Led cloud migrations involving 5TB+ of data and implemented monitoring solutions to improve visibility and reliability.
- Reduced operational costs by 30% through optimization and automation initiative.
- Advised clients on solution delivery and technical strategy, supporting business growth and successful project execution.

Videocon International Ltd

Technical Production Engineer

6 Years

PRIMARY SKILLS

- **Project Management:** Agile, Scrum, MS Project, Jira, Asana, Lean Six Sigma (Yellow Belt)
- **Database Administration:** MS SQL Server, PostgreSQL, MySQL

- **Cloud Technologies:** AWS, Azure, GCP, OCI and Cost Optimization (FinOps)
- **Architecture:** Enterprise Architecture, System Design

ADDITIONAL SKILLS

- **Cloud Databases:** AWS Aurora, RDS, DynamoDB, Google Cloud SQL, Spanner, Azure SQL Cosmos
- **DevOps Tools:** Docker, Terraform, GitHub, Prometheus, AWS CloudFormation,
- **Data & Analytics:** Amazon Glue, SSIS, Power BI, Azure AI Fundamentals
- **Security & OS:** Cloud Security, Penetration Testing, Windows Server, Ubuntu, Kali Linux

EDUCATION

- Bachelor's Degree in Electronics and Communication Engineering
- Diploma in Electronics and Communication Engineering

CERTIFICATION

- **Coursera** - Google Project Management, CCSP, CISSP, DevOps. Ethical hacking, PMI-ACP | Lean Six Sigma Yellow Belt | Scrum Master (Skill Soft) | Microsoft Certified (MCDBA / MCITP – SQL Server)

AWARDS & RECOGNITIONS

- **Annual Excellence Budding Innovation, Outstanding Contribution, Customer Centricity & Best Resource in (2015/16)**

LEADERSHIP STRENGTHS

- Strategic leadership and stakeholder management across cross-functional teams.
- Extensive experience working with global teams and enterprise clients.
- Strong focus on automation, process optimization, governance, and compliance
