

# TAMILVANAN

SOFTWARE ENGINEER

## PROFILE

Full-stack Software Engineer with 1.5 years of experience building production-grade web applications using Angular, NestJS, Node.js, and MySQL. Experienced in developing reusable frontend components, scalable backend services, and working across frontend, backend, and database layers with a focus on clean architecture and maintainable code.

## WORK EXPERIENCE

### 2026 - PRESENT

Stellar Innovation

#### Software Engineer

- Developed and maintained Angular front-end applications.
- Built back-end services using NestJS and MySQL.
- Contributed to large-scale Angular and NestJS applications deployed on AWS, handling feature development, bug fixes, and performance improvements.
- Created reusable UI component libraries for internal use.

### 2025 - 2026

Stellar Innovation

#### Junior Software Engineer

- Built an Ultra-Table Angular library with virtual scrolling for large datasets
- Developed features for attendance and server management systems
- Fixed bugs and collaborated on testing and deployment
- Worked with Angular, Node.js, and MySQL stack

### 2024 - 2025

Stellar Innovation

#### Junior Software Developer

- Learned Angular, TypeScript, and RxJS fundamentals
- Contributed to frontend development tasks
- Worked on bug fixes and feature enhancements
- Gained experience with REST API integration

## EDUCATION

2020 - 2024

MCE - MUTHAYAMMAL COLLEGE OF ENGINEERING

- B.E - Bachelor of Engineering - Computer Science and Engineering

## SKILLS

### Frontend

- Angular (Latest)
- TypeScript, JavaScript
- HTML, CSS
- RxJS, NgRx
- Angular Signals
- Tailwind CSS

### Backend

- NodeJs
- NestJS
- ExpressJs
- Redis
- REST API Design
- API performance optimization
- Clean architecture

### Database & Data Management

- MySQL
- SQLite
- Prisma ORM
- Sequelize ORM
- Database schema design

### System & Infrastructure

- Linux (basic server management)
- Docker (containerized development)
- Raspberry Pi (self-hosted applications)
- System design fundamentals
